WORK EXPERIENCE

KLog.co

Full Stack Junior Engineer

Sept. 2024 – Present

Santiago, Region Metropolitana

- Lead Architect for web API V4: Lead the design and implementation of the company's next generation web api, transitioning the implementation to the DCSA standards for logistics.
- Developer Experience Optimization: Engineered a standardized request/response lifecycle featuring descriptive, automated error logging and a streamlined authentication flow, significantly reducing client onboarding.
- Technical leadership & Quality assurance: Acted as the primary consultant for the v4 api ecosystem, conducting research and providing technical insights to ensure architectural consistency and high code quality.
- Full-Stack Integration: Developed and integrated high-priority client functionality across both frontend and backend services, ensuring seamless data flow between the Web API and user-facing applications.

USAFE

Tech Lead

Mar. 2025 – Dec. 2025

Santiago, Region Metropolitana

- Lead a team of 6 engineers into the development of a safe routes platform, including an Android application, backend services, and an administrative web portal.
- Architected the core system infrastructure, defined technical standards, and implemented quality assurance processes to ensure robust and on-time delivery.
- Mentored team members, established clear performance expectations, and managed task allocation.

Forcast.
